Systems Spray-Cooled provides its 1,000th Spray-Cooled™ component with recent order to Nucor Steel Berkeley

For Immediate Release, Nashville, TN --

Earlier this year, Systems Spray-Cooled delivered two (2) electric arc furnace (EAF) roofs and (2) elbows to Nucor Steel Berkeley. The new steep sloped roofs and modernized elbows replace the original Spray-Cooled™ equipment supplied back in 1996 for Berkeley's start-up, achieving 23 years of service life!

These components were Systems' 999th, 1000th, 1001st and 1002nd piece of Spray-Cooled™ equipment supplied in the company's 33 years of designing and manufacturing Spray-Cooled™ furnace parts. Nucor continued its push for the safest, lowest cost option for water-cooled melt shop equipment.
