

PRESS RELEASE

ANDRITZ to modernize electrical and automation systems at voestalpine steel mill

GRAZ, DECEMBER 12, 2024. International technology group ANDRITZ received an order from voestalpine to modernize the electrical and automation systems of a hot-dip galvanizing line at the steel mill in Linz, Austria.

This processing line, which produces high-quality galvanized steel strip, has been continuously modernized since it began operations in 1973. Over the years, numerous rebuilds and upgrades have resulted in the use of a variety of electrical and automation systems.

ANDRITZ will replace this variety with a unified, consistent, and user-friendly electrical and automation system that supports efficient operation. To minimize the impact on production, ANDRITZ will implement the modernization in several stages, with completion scheduled for the end of 2028.

This order underscores the long-standing cooperation between ANDRITZ and voestalpine, one of the world's leading steel and technology groups.

ANDRITZ GROUP

International technology group ANDRITZ offers a broad portfolio of innovative plants, equipment, systems, services and digital solutions for a wide range of industries and end markets. Sustainability is an integral part of the company's business strategy and corporate culture. With its extensive portfolio of sustainable products and solutions, ANDRITZ aims to make the greatest possible contribution to a sustainable future and help its customers achieve their sustainability goals. ANDRITZ is a global market leader in all four of its business areas – Pulp & Paper, Metals, Hydropower and Environment & Energy. Technological leadership and global presence are cornerstones of the group's strategy, which is focused on long-term profitable growth. The publicly listed group has around 30,000 employees and over 280 locations in more than 80 countries.

ANDRITZ METALS

ANDRITZ Metals is – via the Schuler Group – one of the world's leading suppliers of technologies, plants and digital solutions in metal forming. The product portfolio also includes automation and software solutions, process know-how and service. In the metals processing segment, the business area offers innovative, sustainable and market-leading solutions for the production and processing of flat products, for welding systems and furnaces with its own burner solutions, as well as services for the metals processing industry.
